

200mm LED Traffic Signal Modules

Design For:

This LED Traffic Signal Module / LED Lampwick / LED Core was design to replace the traditional Incandescent Bulb which use for the Traffic Lights, with both Trailing Cable and E27 Base(we do have E27 Base for Red, Yellow and Green Ball at present only), you do not need change the existed housing, just replace the inside Bulb directly. With BBE patented 5 degree down optical lens, BBE LED Traffic Signal Module / LED Lampwick / LED Core, which gives you more convenient to replace and save more energy.

Special Features:

1. **5 Degree Lens:** With a degree down optical lens, this can also enlarge the LED beam pattern
2. **High Brightness:** with the best quality LED components
3. **Long Life:** up to 50,000 hours, adopts PWM constant current power, protects LED efficiently
4. **Energy Saving:** With a very low power consumption which can save up to 80-90% energy
5. **Related approvals:** CE, ITE, Chinese GB14887-2003 standards, and related international standards
